

01. 用toast測試list是否可以完整跑一次並顯示

02. 將list新增屬性加入到latesNews

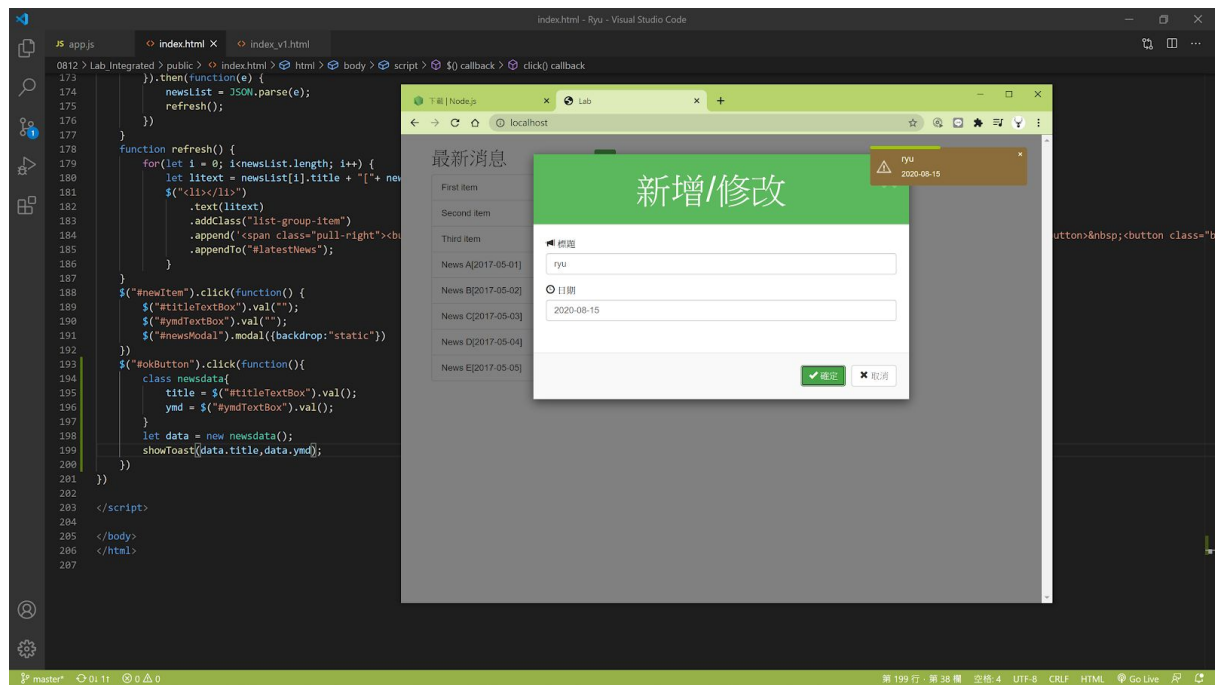

03.將資料庫的內容取出並更新list

The screenshot shows a Visual Studio Code editor on the left with a file named `index.html` open. The code defines a `newsList` array with five news items and a `refresh()` function that updates the DOM. On the right, a web browser at `localhost` displays the '最新消息' (Latest News) page. The page shows a list of five news items, each with a title, date, and two buttons (edit and delete). The list is: 'First Item', 'Second Item', 'Third Item', 'News A[2017-05-01]', and 'News B[2017-05-02]'. The status bar at the bottom indicates 'master' and line 173.

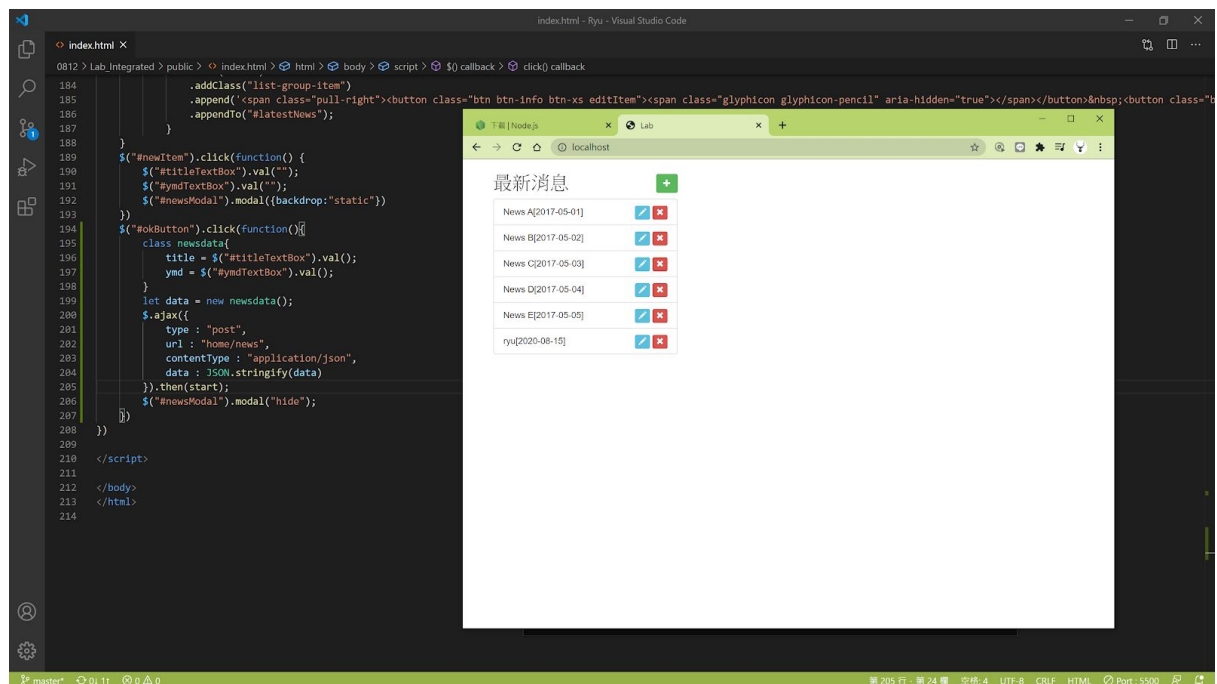

04.將新增資料modal開啟測試

The screenshot shows the Visual Studio Code editor on the left with the `index.html` file. The code includes a `start()` function and a `refresh()` function. On the right, the web browser shows the '最新消息' page with a modal dialog titled '新增/修改' (Add/Edit) open. The modal has a title input field, a date input field (with a placeholder 'yyyy-mm-dd 例如: 2017-05-20'), and '確定' (Confirm) and '取消' (Cancel) buttons. The status bar at the bottom indicates 'master' and line 189.

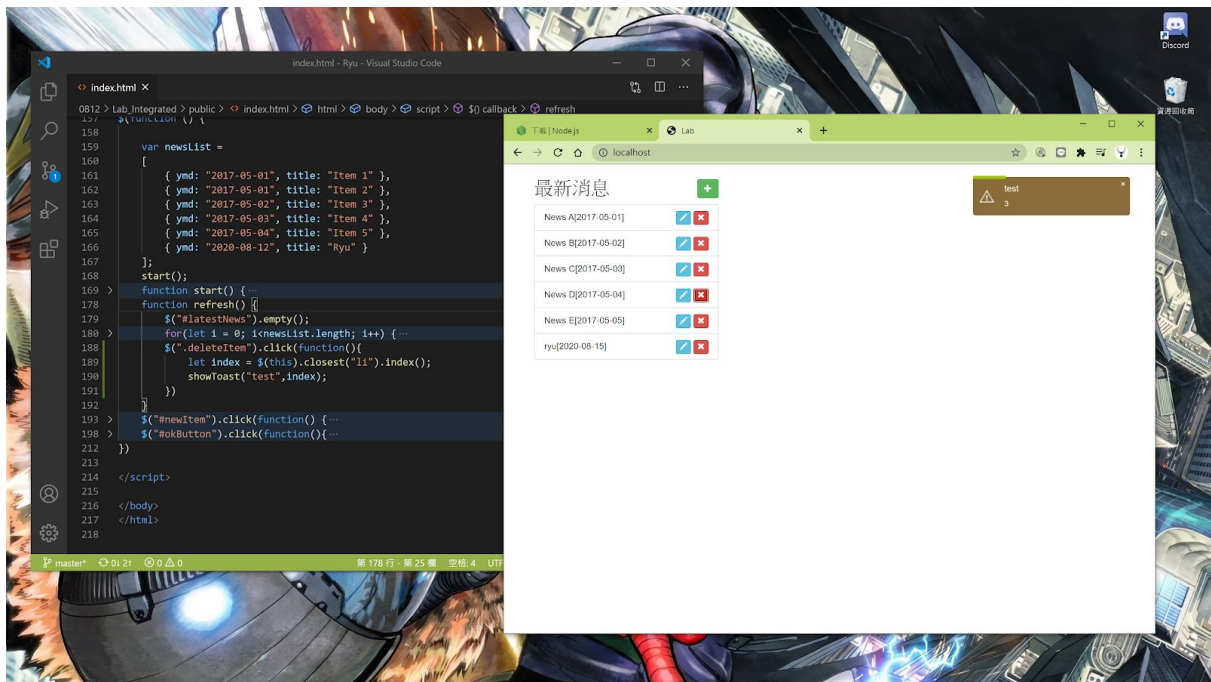

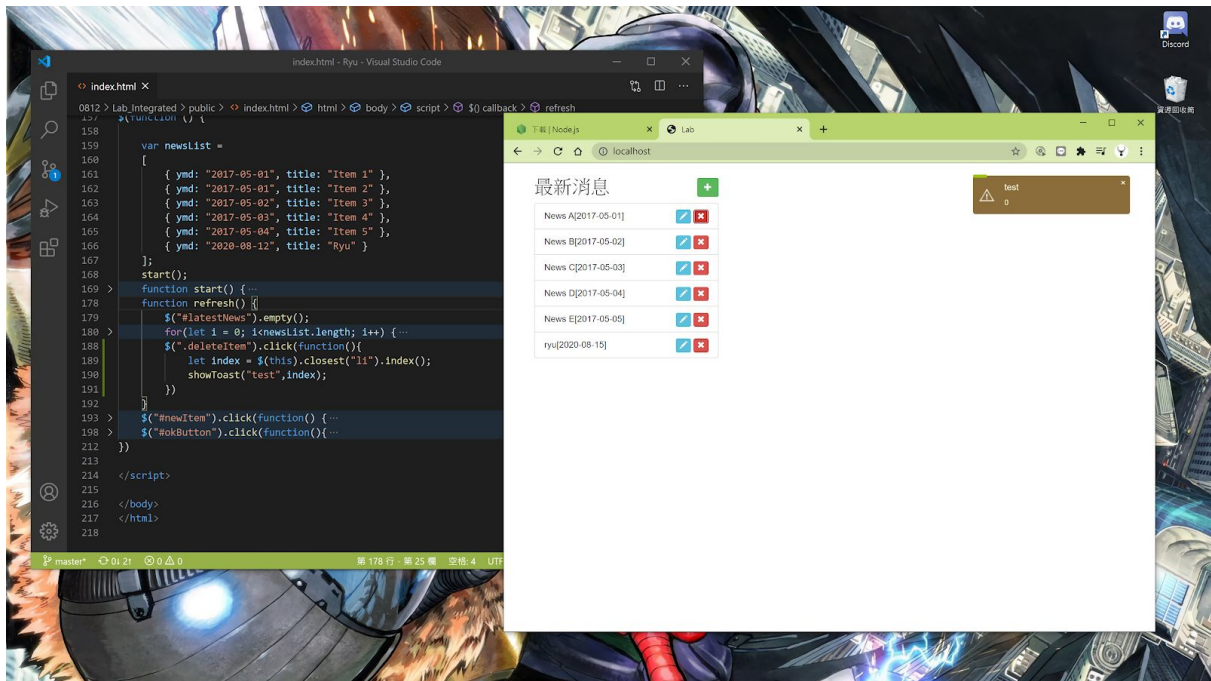

05.在modal的文字框內輸入內容設定okButton並用toast測試

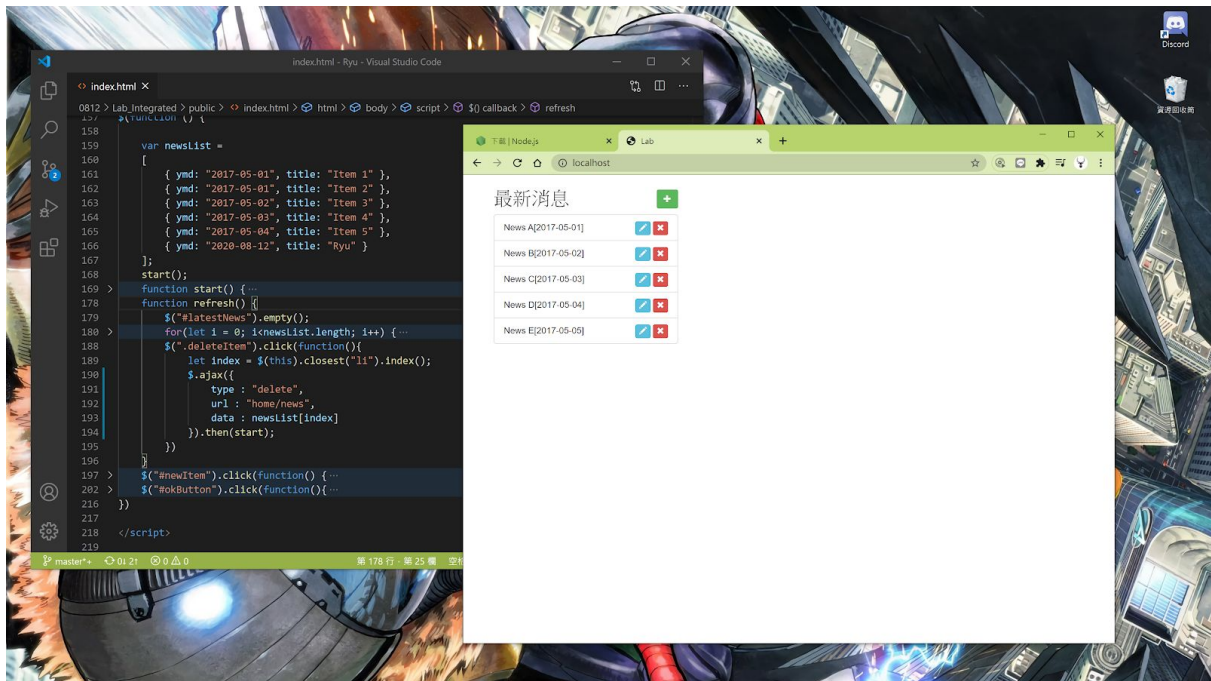

06.將okButton設定post並隱藏modal

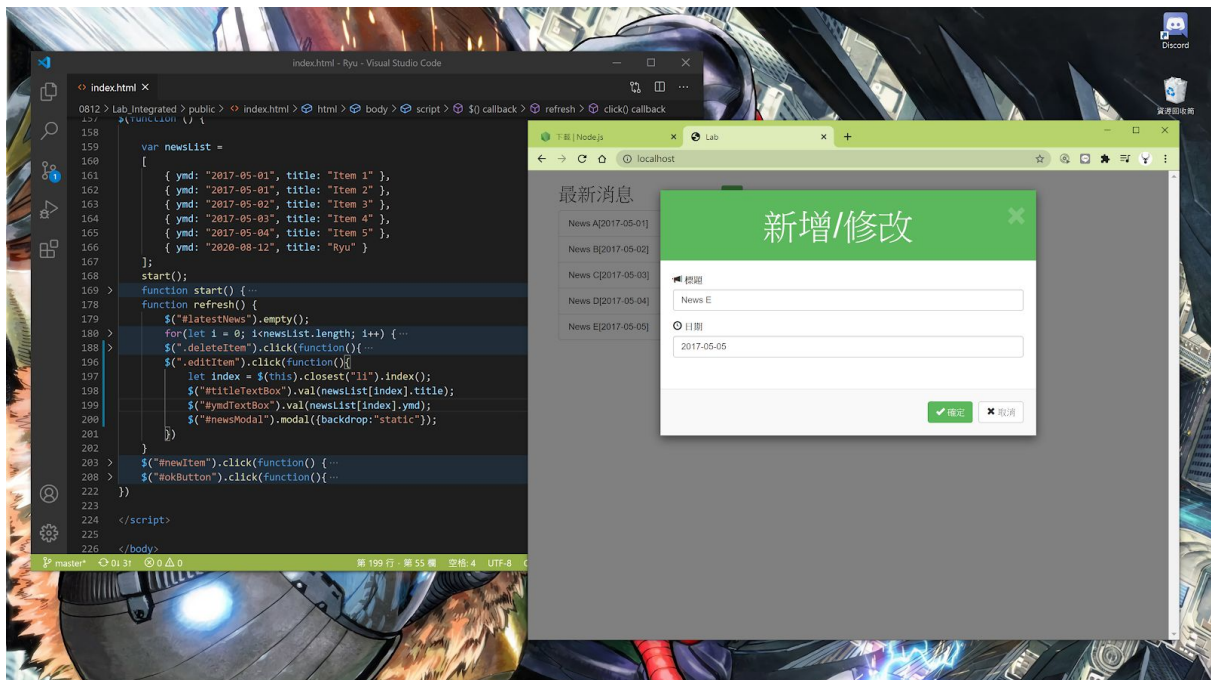

07~08測試delete的索引值並用toast顯示

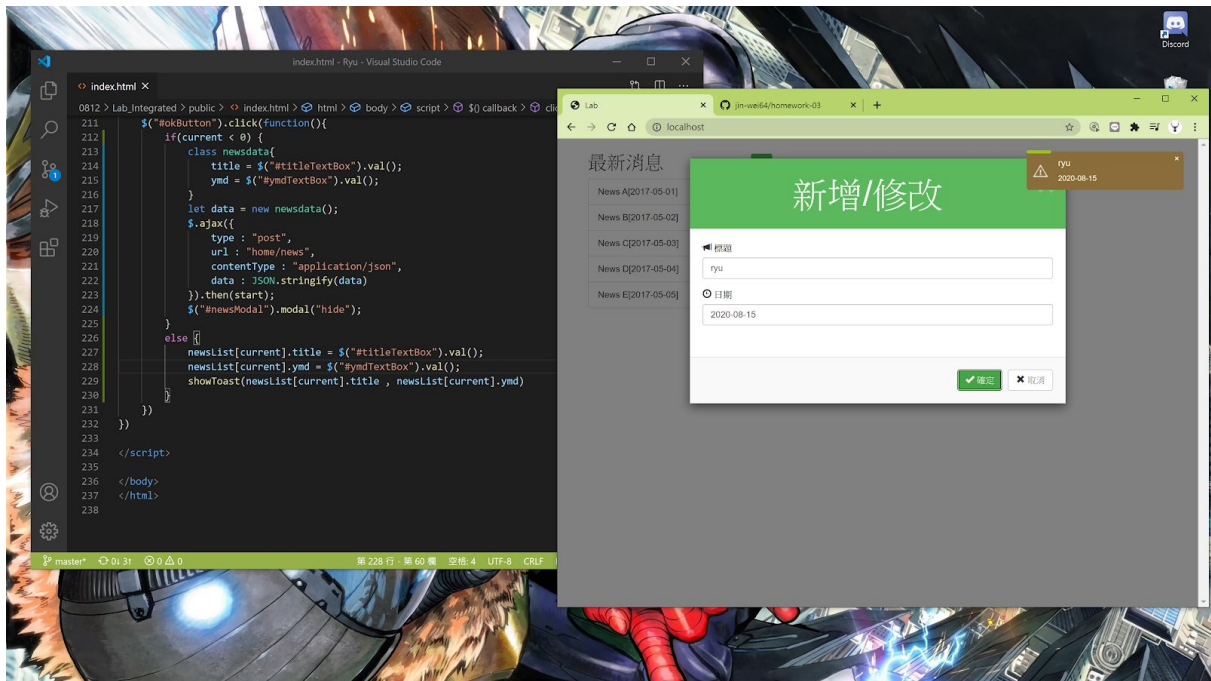

09.將delete的功能設定完並刪除最後一筆ryu的資料

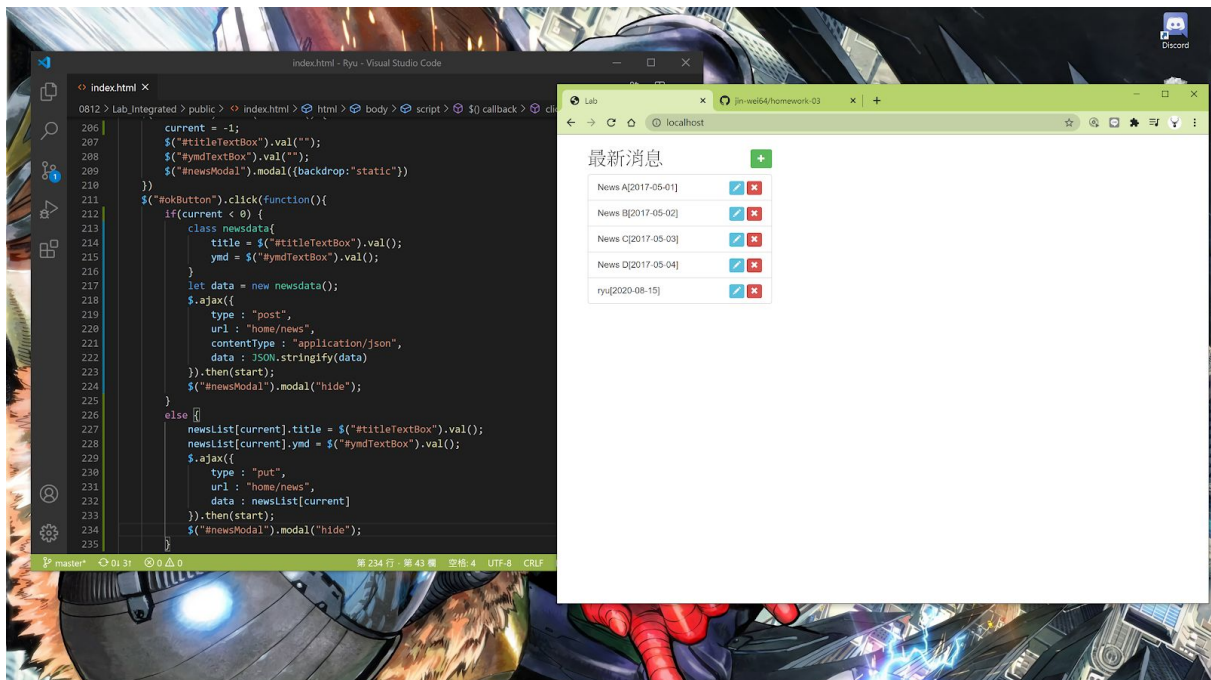

10.將edit的modal設定代入資料並讓text內容顯示正確

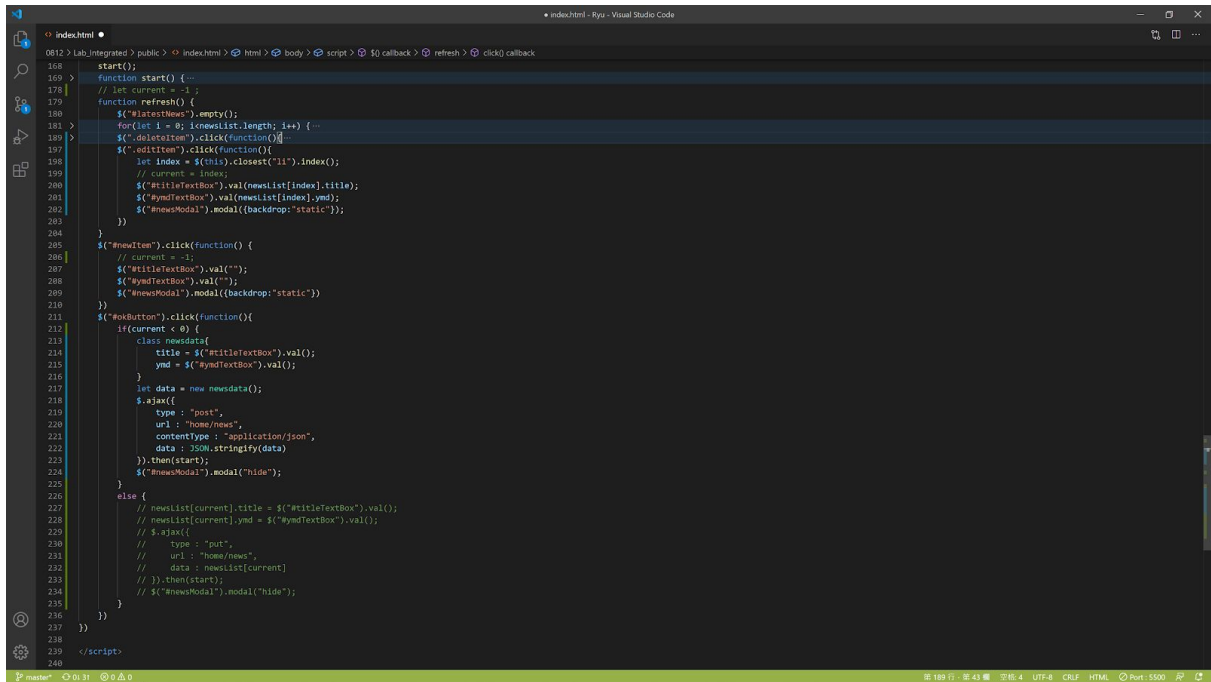

11. 隨意修改其中一筆資料, 並用toast顯示是否為更新後的資料

12. 將按鈕設定完畢然後將最後一筆資料改動

13.第12張步驟的補充，用if else判斷使用者點擊的是新增還是修改的okButton並作業,因為加入的內容位置不統一 所以圖片上註解的部分為最後步驟所添加的內容以便查看

```
0612 > Lab_Integrated > public > < > index.html > html > body > script > $() callback > refresh > click() callback
start();
168
169 > function start() {
170 // let current = -1;
171 function refresh() {
172   $(".deleteItem").empty();
173   for(let i = 0; i < newsList.length; i++) {
174     $(".deleteItem").click(function() {
175       $(".editItem").click(function() {
176         let index = $(this).closest("li").index();
177         // current = index;
178         $(".titleText").val(newsList[index].title);
179         $(".ymdText").val(newsList[index].ymd);
180         $(".newsModal").modal("show");
181       });
182     });
183   }
184 }
185 $(".newsItem").click(function() {
186   // current = -1;
187   $(".titleText").val("");
188   $(".ymdText").val("");
189   $(".newsModal").modal("show");
190 });
191 $(".okButton").click(function() {
192   if(current < 0) {
193     class NewsData {
194       title = $(".titleText").val();
195       ymd = $(".ymdText").val();
196     }
197     let data = new NewsData();
198     $.ajax({
199       type: "post",
200       url: "home/news",
201       contentType: "application/json",
202       data: JSON.stringify(data),
203     }).then(start);
204     $(".newsModal").modal("hide");
205   }
206   else {
207     // newsList[current].title = $(".titleText").val();
208     // newsList[current].ymd = $(".ymdText").val();
209     // $.ajax({
210     //   type: "put",
211     //   url: "home/news",
212     //   data: newsList[current],
213     // }).then(start);
214     // $(".newsModal").modal("hide");
215   }
216 })
217 }
218
219 </script>
220
```
